● ABOUT ME

I am a passionate WordPress developer with expertise in creating robust and user-friendly websites. With a focus on clean design and efficient functionality, I strive to deliver projects that exceed expectations. My goal is to leverage technology to solve real-world problems and enhance user experiences

● WORK EXPERIENCE

02/01/2025 – CURRENT Lahore, Pakistan

PLATINUM COMMUNICATION (PLC) SENIOR WORDPRESS DEVELOPER

As a WordPress developer, I focus on designing and customizing websites with an emphasis on functionality and database management. I create responsive and high-performing websites using HTML, CSS, JavaScript, and PHP. My expertise includes integrating services, optimizing site speed, enhancing SEO, and resolving technical issues. I prioritize website security, provide consistent client support, and collaborate effectively with teams to ensure successful project outcomes.

21/10/2024 – 01/01/2025 Lahore, Pakistan

XTRAORDINARY MINDS WORDPRESS DEVELOPER

As a **WordPress developer**, I specialize in building and customizing websites, ensuring a seamless balance between design, functionality, and database management. With expertise in HTML, CSS, JavaScript, and PHP, I focus on creating user-friendly, high-performance sites. I also integrate various services, optimize site speed, improve SEO, and troubleshoot technical issues. Additionally, I prioritize website security, offer ongoing client support, and work collaboratively with teams to deliver top-quality results.

20/06/2022 – 20/10/2024 Lahore, Pakistan

WORDPRESS DEVELOPER DEVCAUSE

As a WordPress developer, I specialize in creating and customizing websites. I focus on design, functionality, and database management using HTML, CSS, JavaScript, and PHP. I also integrate services, optimize site speed, SEO, troubleshoot issues, and collaborate with teams, while providing security and client support.

Theme Development:

- **Custom Theme Development:** Built custom themes from scratch, ensuring responsiveness, cross-browser compatibility, and performance optimization.
- **Theme Customization:** Customized existing themes to align with branding and client needs, integrated third-party plugins, and ensured mobile-first designs.
- **Theme Optimization:** Improved load times through minification, reduced HTTP requests, and implemented SEO-friendly structures.

Plugin Development:

- **Custom Plugin Development:** Created custom plugins for post types, shortcodes, widgets, and forms.
- **Plugin Customization:** Adapted plugins to meet client requirements, integrated third-party APIs, and ensured plugin compatibility.
- **Plugin Optimization:** Enhanced performance for faster loading and improved security.

General Skills:

- **Proficient in HTML, CSS, JavaScript, and PHP:** Built dynamic and interactive site elements and handled both front-end and back-end tasks.

- **MySQL Database Management:** Designed and maintained optimized MySQL databases for WordPress sites.
- **REST APIs & Integrations:** Integrated third-party APIs and developed custom API endpoints for data exchange.
- **Responsive & Mobile-First Design:** Implemented responsive designs for consistent user experience across devices.
- **Troubleshooting & Debugging:** Identified and resolved PHP errors, WordPress conflicts, and performed thorough testing.
- **SEO Best Practices:** Implemented on-page SEO, optimized site structure, and improved search engine visibility.
- **Version Control with Git:** Managed code with Git and collaborated effectively with teams using Git workflows.
- **Performance Optimization:** Implemented lazy loading, CDN integration, and caching strategies to boost site speed.
- **Hosting & Security Management:** Configured web hosting environments, monitored server performance, and applied security measures.

AUSTIN LEASER PROJECT FREELANCING

Advanced Surgical Solutions: I created the Austin Laser project, utilizing various technologies such as Figma, HTML, CSS, PHP, JavaScript, WordPress, and custom code. This project focuses on providing cutting-edge laser-based surgical treatments to enhance the precision and effectiveness of surgical procedures, ensuring better patient outcomes and reduced recovery times.

Comprehensive Patient Care: By leveraging these technologies, I designed the Austin Laser project to offer comprehensive patient care, from initial consultation to post-operative follow-up. Integrating advanced technology and personalized treatment plans, I strive to deliver a superior healthcare experience for patients undergoing surgical treatments.

AMPLIFY PROJECT FREELANCING

Flexibility and Customization: By leveraging WordPress alongside custom coding, I created Amplify to provide a highly customizable user experience. This allows for tailored banking features and unique design elements that meet specific user needs and preferences.

Security and Performance: Integrating custom coding with WordPress, I ensured that Amplify maintains high-security standards and optimized performance, crucial for handling sensitive financial data and delivering a seamless banking experience.

KANSAS CITY PROJECT FREELANCING

Comprehensive Stadium Management: I created the Kansas City Project to manage various aspects of the stadium, including food services, ground capacity, quality, and staff booking system. Utilizing Mapbox, this project ensures efficient and effective management of all stadium-related operations.

Event Management System: The Kansas City Project also includes an advanced event management system. This website allows for seamless planning and execution of events, providing a user-friendly platform for organizing and managing all stadium events with ease.

SAPHYRE FREELANCING

Supportive and Accessible Environment: I created the Marry Lee Foundation project to provide a supportive and accessible environment for adults with diverse needs, ensuring they have the resources and assistance required for a fulfilling life.

Affordable Living: This project spans a 10-acre city block in South Austin, offering affordable housing and facilities designed to cater to the varied needs of the community, promoting inclusivity and well-being.

MARRY LEE FOUNDATION PROJECT FREELANCING

Supportive and Accessible Environment: I created the Marry Lee Foundation project to provide a supportive and accessible environment for adults with diverse needs, ensuring they have the resources and assistance required for a fulfilling life.

Affordable Living: This project spans a 10-acre city block in South Austin, offering affordable housing and facilities designed to cater to the varied needs of the community, promoting inclusivity and well-being.

BALCONES RECYCLE PROJECT FREELANCING

Pioneering Recycling Efforts: I created the Balcones Recycle project to pioneer recycling efforts aimed at maximizing materials recovery. This initiative focuses on innovative methods to ensure that more materials are effectively recycled and reused.

Building the Circular Economy: The project is dedicated to building a circular economy, where waste is minimized, and resources are continually repurposed. This approach promotes sustainability and environmental responsibility.

08/10/2018 – 15/02/2020 Lahore, Pakistan

MICROSOFT DYNAMICS AX (ERP) CONSULTANT NISHATLINEN

I am working as Microsoft Dynamics AX, now called Dynamics 365 Finance and Operations. It's an ERP system that helps us manage our business operations. With Dynamics AX, we handle finances, manage supply chains, and improve how we make and sell products. The software works smoothly with other Microsoft tools, giving us instant insights into how well our business is doing and helping us make better decisions.

31/07/2016 – 29/09/2018 Sargodha, Pakistan

INTERNSHIP DEPARTMENT OF FINANCE AS A COMPUTER OPERATOR ZARAI TARAQIATI BANK LTD

As a computer operator, my role involves managing and operating computer systems and networks to ensure they run smoothly. I handle tasks like monitoring system performance, responding to user inquiries, and troubleshooting technical issues. I also assist with software installations, updates, and data backups to maintain system integrity and security. My responsibilities include maintaining records of computer operations, generating reports, and following protocols to ensure the reliability and efficiency of our IT infrastructure.

● **EDUCATION AND TRAINING**

26/06/2019 – 11/11/2021 Sargodha, Pakistan

MASTER OF INFORMATION TECHNOLOGY (MSC-IT) University Of Sargodha

Supervisor Name: Mr. Nisar Ahmad

List of Semester Projects:

- 1. **Bus Reservation System (FYP):** I created a Bus Reservation System for easy booking and management of bus tickets. It lets passengers find buses by route, date, and time, and book seats securely. There's user login, online payments with Stripe, and an admin panel for managing schedules and bookings. Built with simple web technologies for a smooth user experience.
- 2. **Time Management System:** I created a time management system to help users organize their tasks and schedules. Users can add tasks with due dates and priorities, sync with their calendars, and track time spent on tasks. The system sends reminders and generates reports to show how time is used. It has an easy-to-use interface, perfect for improving productivity.
- 3. **Home Lights Control System:** I created a home lights control system that lets users control their lights remotely via a mobile app or voice commands. Users can set schedules, adjust brightness, and integrate with smart assistants like Alexa and Google Home. This system makes managing home lighting convenient and energy-efficient.
